

# Dynamics 365 for Sales

2019 release wave 2  
October 2019-March 2020

In this guide, you will be able to learn the most important things about this release wave. These will help you plan to onboard the release updates with confidence.

## Top things to know

### New capability highlights

The **2019 release wave 2**, brings to market significant new services and capabilities to enable digital transformation for businesses. For Dynamics 365 for Sales, these new capabilities include:

- **Microsoft Teams integration enhancements** help to connect Dynamics 365 records to Teams channels without leaving the Dynamics 365 app.
- **Contextual email communication.** Salespeople will be able to write email with context of the record they are working on, navigate between records, have multiple active draft emails open simultaneously, preview the content before sending, add attachments, and be able to use email templates to optimize commonly used tasks.
- **Simplified lead management experience** introduces improvements across top scenarios related to lead management.

### Key milestones

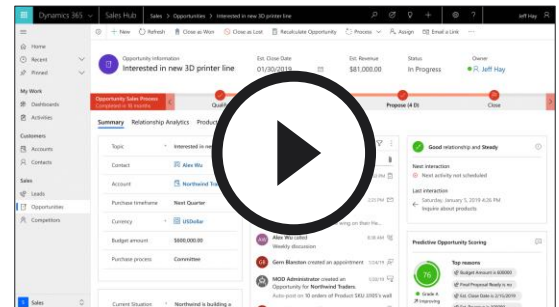

Get prepared to onboard the new 2019 release wave 2 updates with confidence. Early access to this release wave, October update, will start on **August 2<sup>nd</sup>, 2019** and will be generally available on **October 1<sup>st</sup>, 2019**.

### For application administrators

End-user impacting features should be reviewed by application administrators. This facilitates release change management and enables successful onboarding of new capabilities released to market. Look for all features tagged "End users, automatically" in the release plan.

## New capability highlights

These capabilities outline our commitment to deliver on our roadmap priorities. To learn more about the entire set of capabilities being delivered during this release wave, visit: [aka.ms/ROGS19RW2RP](https://aka.ms/ROGS19RW2RP)

### Microsoft Teams integration enhancements

Dynamics 365 integration with Teams was introduced in April 2019. Enhancements help to connect Dynamics 365 records to Teams channels without leaving the Dynamics 365 app. Sellers will receive team member recommendations, during the connection flow, based on Dynamics 365 access privileges. To further improve the extensibility, file sharing can now be enabled for any out-of-the-box and custom entities, across Dynamics 365 and Teams connections. Connections refer to the ability to add a Dynamics 365 tab to a Teams channel. Feature details include:

- When connecting a Dynamics 365 record to a Teams channel, relevant members are suggested based on users associated with the Dynamics 365 record. Member suggestions will be available to a user if designated as a channel owner.
- SDK support is now available for the Microsoft Teams integration feature for any entity type, including custom entity types.
- When creating a Teams channel from the Dynamics 365 record page, users can automatically connect the Dynamics 365 record to the selected channel.

### Contextual email communication

With a rich text editor and a pop-up non-blocking window, composing email has never been better in Dynamics 365 for Sales. Salespeople will be able to write email with context of the record they are working on, navigate between records, have multiple active draft emails open simultaneously, preview the content before sending, add attachments, and be able to use email templates to optimize commonly used tasks. The email opening up in a non-blocking window gives salespeople all the relevant content at a glance, while they compose their email to the customer.

### Simplified lead management experience

To help our customers maximize productivity, we are introducing improvements across top scenarios related to lead management.

Top scenarios include:

- Auto populate contact and/or company-related fields when a sales rep selects an existing contact and/or account at the creation of a new lead.
- Display notes and attachments captured by a sales rep when promoting a lead in the opportunity record after the lead is qualified.
- Enable sales reps to qualify leads and quickly move to the next stage of the sales cycle: optionally create opportunity, account, or contact records based on the organization-level settings configured by the admin for the lead creation experience. The default setting would be Yes, which would automatically create an account, contact, and opportunity when qualifying a lead.
