

Lower your DSO, increase your working capital, and free up massive amounts of back-office time.

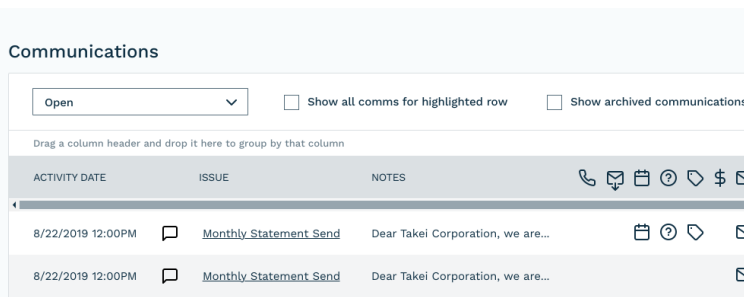

We're changing how AR works with customers so they can get cash easier and faster.

Outlook and Excel aren't designed to improve AR productivity. Outlook and Excel for teams means manual communications and data entry. That means you don't have the necessary automation, customer self-service, or visibility to improve your AR operations.

That's why we built Anytime Collect. With Anytime Collect, you can collect more cash with less effort and dramatically reduce your DSO. Powered by a rules engine, Anytime Collect provides automated customer communications, customer self-service, and collections activity management that makes your bank balance bigger.

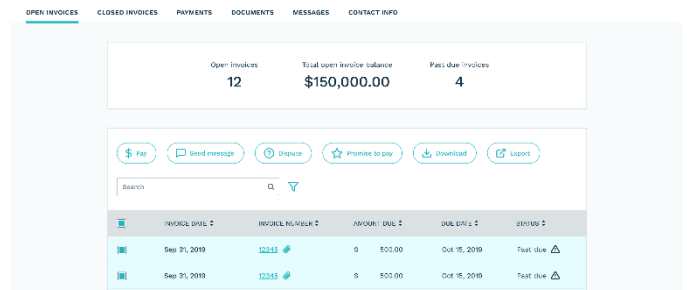

Automated Communications scales AR.

- Trigger personalized reminders as invoices become due.
- Send dunning communications as the invoices age and copy sales.
- Engage on multiple channels: email, text, and automated calls.

Customer Self-service cleans out your inbox.

- Get paid faster online and automate cash application.
- Resolve disputes faster with built in escalations.
- Automatically capture promise-to-pay and automatically follow-up.

Next Best Task

| CUSTOMER NAME ↑ | DESCRIPTION | TYPE ↑ | FOLLOW-UP DATE ↑ | ENTERED DATE ↑ |
|---------------------|--------------------------------------|-----------|------------------|----------------|
| Jump Electronics | Rule Alert - D&B High Risk - Cred... | Follow-up | Aug 8, 2019 | July 10, 2019 |

About Lockstep. We believe in the power of connection to change the way accounting processes work between companies. We're revolutionizing a new way for AR and AP to share data and improve efficiency of their operations. We call it Connected Accounting. Anytime Collect is our first product, and it's revolutionizing accounting already.
